## OBJECTIVE

Apprentice learning software engineering. Capable of quickly learning the necessary technologies to be able to succeed in a career in the tech industry. Team leader, able to work well with others and able to work independently as well. Adept at designing and building applications with user experience and performance in mind.

## EDUCATION

**South Mecklenburg High School** | 2014 - 2018
- Graduated top 10% in class
- GPA: 4.375

## WORK EXPERIENCE

**Road to Hire |** April 2022 - Present | **Software Engineer Apprentice**
- Learned full-stack software development.
- Led and built a front-end focused non-profit website using HTML CSS and Javascript.
- Designed an environmentally focused application using front-end and back-end technologies
- Self-motivated apprentice that is skilled at understanding and defining scope, leading teams effectively and applying learned skills to deliver successful time- sensitive projects.

**Marbach America**  | August 2019 - September 2021 | **Tool & Die Maker**
- Interpreted design and blueprints using software according to customer specifications, timeline and supply inventories.
- Worked with team members to complete simultaneous projects, successfully meeting all key milestones.
- Responsible for suggesting methods to improve area operations, efficiency, and service to external customers.

**Siemens** | June 2019 - August 2019 | **CNC Intern**
- Studied blueprints, work instructions, sketches, drawings, and manuals to determine dimensions and tolerances.
- Shadowed experienced CNC programmers by programming and operating CNC machines running components for the energy industry.
- Reviewed blueprints, specifications, and programming code to accurately plan work.

## CERTIFICATIONS

**Growth Driven Design | HubSpot Academy**
- Fully capable and skilled in using the Growth-Driven Design framework. Tested on best practices.
- Capable of applying best practices to build and optimize a peak-performing website.

**Learn Javascsript | Codecademy**
- Mastered the JavaScript fundamentals needed for front-end and back-end development.

## PRO & PERSONAL SKILLS

HTML / CSS / Javascript / Node / MySQL / Git & Github / Team Management / React
